

Serial No. 10, 017,180

Page 2 of 6

Amendments to the Specification:

Please replace the paragraph beginning at page 3, line 10 with the following amended paragraph:

It is known that a functioning immune system contributes to overall good health, including healthy skin. Researchers at Shiseido and Harvard Medical School and Massachusetts General Hospital, see, for example, the Shiseido website at “www.shiseido.co.jp”, have hypothesized that use of make-up promotes a positive state of mind which in turn promotes beautiful skin through stimulation of the nervous system and internal secretions. Conversely they hypothesize that skin condition can deteriorate because of stress.
